

Drive progress in the power sector with distributed energy

SECTOR GOVERNANCE:

How can electricity distribution become viable and sustainable?

Structure the sector to drive electrification that is universal, affordable, and permanent

Integrated Distribution Frameworks

EFFECTIVE PLANNING:

What is the least-cost approach to providing power?

Use geospatial tools to map supply to demand

Integrated Electrification Planning

ATTRACTING INVESTMENT:

How do I bring more financiers and projects to the country?

Provide robust regulations and de-risk the sector

Policy and Regulatory Frameworks

UNIVERSAL ELECTRIFICATION:

Will a subsidy to address affordability enable rapid, effective deployment?

Target support through a proven solution

Universal Energy Facility

IMPACTFUL ELECTRIFICATION:

What ensures electrification will create jobs, increase incomes, and improve livelihoods?

Enable businesses and agriculture with appliances

Energy Efficiency & Productive Use

AFFORDABLE ELECTRIFICATION:

What can I do to reduce the subsidy needs and costs to end-users?

Support investor-backed pooled procurement

Procurement & Innovation Facility

Universal electrification provides affordable power for users, and is sustainable for government in the long term
