ORGANIZATIONAL INFORMATION

MEETINGS

The annual meeting of the Corporation and a regular stated meeting of the Board of Trustees were held on April 4, a stated meeting of the Board was held on December 3 and 4, and a special meeting of the Board was held on September 19. Six regular meetings of the Executive Committee of the Trustees were held to take actions within the general policies approved by the Board.

TRUSTEES AND PRINCIPAL OFFICERS

John S. Dickey, President Emeritus and Bicentennial Professor of Public Affairs of Dartmouth College, retired as a Trustee, effective June 30. He was elected in 1947 and has served as a member of the Executive Committee, as Chairman of the Nominating Committee, and as Committee on Audit.

Frank Stanton, formerly President of the Columbia Broadcasting System and now Chairman of the American National Red Cross, also retired from the Board on June 30. He was elected in 1961 and has served as a member of the Executive and Finance Committees, and as Committee on Audit.

At the April meeting of the Corporation, Jane P. Cahill, Vice-President, Communications, International Business Machines Corporation, was elected a Trustee, effective July 1. Miss Cahill, a former White House Fellow, is a member of the Council on Foreign Relations and the Committee on Selection for the Rockefeller Public Service Awards.

Also at the April meeting, Lane Kirkland, Secretary-Treasurer of the AFL-CIO, was elected a Trustee, effective July 1. Mr. Kirkland is President of the Institute of Collective Bargaining and Group Relations, a member of the Presidential Commission on Financial Structure and Regulation, and a Director of the Associated Councils of the Arts.

Kenneth Wernimont, Vice-President for Administration since 1963, resigned from that position effective December 31; he will remain at the Foundation as Assistant to the President until June 30, 1974, at which time he has requested early retirement. Mr. Wernimont joined the staff in 1952 and has served as Assistant Administrator for Agriculture, Assistant Director for Agricultural Sciences, Assistant Treasurer, and Treasurer.

At the May meeting of the Executive Committee, Ellsworth T. Neumann was elected Vice-President for Administration, effective January 1, 1974; he joined the Foundation as Assistant to the President on July 1, 1973. Dr. Neumann became a staff member of Massachusetts General Hospital in 1949 and served as its Assistant Director, its Executive Director, and, for twenty years, as its Administrator.

Kenneth W. Thompson, Vice-President since October 1961, resigned from the Foundation as of January 1, 1974. He has been appointed a part-time Consultant and will assist the officers responsible for the programs in University Development, Conflict in International Relations, and Cultural Development. He joined the staff in 1953 and has served as Consultant in International Relations, and as Assistant Director, Associate Director, and Director.

Howard Klein was elected Director for Arts at the February meeting of the Executive Committee. He joined the Foundation staff in July 1967 as an Assistant Director for Arts and since 1971 has served as an Associate Director for Arts and Humanities.

At the June meeting of the Executive Committee, John Maier, an Associate Director for Biomedical Sciences since May 1957, was elected Director, effective July 1. He joined the Foundation in 1940 as a research staff member of the International Health Division Laboratories at the Rockefeller Institute. He also worked on malaria research in Venezuela and Sardinia, served in the Paris Office, and headed the emergency program for Hungarian refugees in 1959-1960. He was appointed an Assistant Director in 1955.

THE PRESIDENT'S REVIEW

A YEAR OF REVIEW

HARD TIMES, HARD QUESTIONS

Pride goeth before a fall. All our efforts will promote only disaster if they are not done in the humility appropriate to our ignorance, never forgetting that we have not made the earth nor the heavens above it. (Chester Barnard, Annual Report of the R.F.—1948.)

The *process* of review is as important as the *purpose* of review. The questions are as important as the answers. Indeed, in the current age of numeracy and computerized cost-benefit analysis, the questions may be more important than the answers, which, even when they are available, have come from head, heart, and intuition.

The fact is that we are passing from an era of hard science into a time that is more concerned with the social sciences and human behavior, where there is a paucity of measurement and control. Although there will always be a desperate need for more knowledge and more technology, and granted that there is frighteningly little time available to the world for the solution of its problems, can technology alone provide solutions? Does technological progress bring about increased happiness? And how does one measure “happiness” and the “quality of life”?

REENTER THE HUMANITIES

Habits do not change as rapidly as techniques; as skill increases, wisdom may fade. And the ancient notion of wisdom has always been the concern of the humanities. The last two hundred years of Western civilization have seen a degradation of the value of wisdom. Today, even as more scientific knowledge and technologies are needed, a humanism based on the objective techniques of the social sciences and the subjective experience of the arts and humanities is desperately needed if life is to be *qualitatively* worthwhile.

Without some moral ordering of priorities on research and technical developments, both at home and abroad, there is every evidence that confusion, alienation, apathy, and conflict will increase and that life on this planet will degenerate—probably with a whimper, hopefully *not* with a bang.

SUPER-PHILANTHROPOID

Ideally, I suppose, the questions we have been asking ourselves during this year of review might best be formulated by an oracular superman who

combines the scholarly attributes of historian, economist, biologist, jurist, cultural anthropologist, artist, population expert, agricultural scientist, public health worker, educator, political scientist, theologian, and environmentalist with those activist attributes of the international financier, businessman, politician, and journalist. If, in addition, our superman could change the influence on his thought processes by the flick of a switch to “sex” (male or female), “color” (white, black, yellow, red), “religion” (Christian, Jew, Muslim, Buddhist, Hindu, atheist, animist), “ideology” (Liberal, Conservative, Communist, Monarchist), we might be able to encompass at least some of the major variables in our quest for how best to allocate the resources of The Rockefeller Foundation to “promote the well-being of mankind throughout the world.” Our man would, of course, be expected to be a visionary, subject neither to complacency nor apocalyptic moods, but seized with at least a modicum of millenarianism.

LISTENING AND READING

The *process* of our review over the past year has involved us with all the intellectual and activist disciplines mentioned here as we have attempted to meet the question of how best to allocate finite resources to infinite ends. The review process is the strategy for clarifying our goals, setting priorities, establishing operational objectives, and providing for the feedback of continuous evaluation, while moving from the long-range to the immediate, from the general to the particular, and from the imprecise to the measurable.

Collectively (through committees) and individually, we have sought the advice of hundreds of people, both here and abroad—from public and private agencies, developed and less-developed countries, academic and free-standing institutions, singly and in groups, generalists and experts, scientists and humanists, men and women of affairs, and men with lean and hungry looks who sleep little o’ nights.

In addition to these countless consultations, we have reviewed written material from diverse sources—the reports of other foundations, analyses of the federal budget, transcripts of congressional hearings, and the deliberations of international bodies.

THE COMPLEAT FOUNDATION OFFICER

Knowing what questions to ask, whom to ask, what to read, and how to synthesize information and advice into understandable form: knowing when and how to time the display of information in terms of a coherent program that will generate understanding and support for the (potentially) unique functions and role of this Foundation—all this demands certain skills, knowledge, and experience that are difficult to acquire.

I believe that the best foundation officers have a distinct set of qualifications that are generally associated with a profession. The foundation officer is both expert (social, agricultural, or medical scientist, or humanist) and generalist, thinker and doer, intellectual entrepreneur, synthesizer and integrator of diverse information and knowledge. Such a person is more than the politician or dilettante (in the laudatory sense of both words), for he or she retains a deep scholarly interest in some established university discipline while adding the functions of integrating generalist, intellectual entrepreneur, and activist.

HISTORIC STRENGTHS OF FOUNDATION POLICY

A review of the Foundation's *style*, which can be defined as the capacity to reach one's ends with the least expenditure of energy, has helped to reinforce the framework within which we work. All human beings lapse into bad habits, take things for granted, pay only lip service to, or just plain forget certain institutional policies that deserve more attention; policies which have stood the test of time and facilitate the achievement of specific goals. I believe the following policies of The Rockefeller Foundation need reaffirmation and reinforcement.

WORKING AT THE ROOTS

The Foundation has focused on *causes* rather than effects; it has avoided fads and fashions. It has stressed the acquisition and transmission of knowledge through support of research and teaching/training programs to the exclusion of supporting services for the relief of human misery, as important as those are. However, the Foundation *has* been heavily involved in the *utilization* of knowledge, through experimental demonstration models, and I believe this will, and should, increase. For example, while we will continue to support certain areas of technical and scientific research in agriculture, we will give greatly increased attention to the problems of integrated rural development and the plight of the small farmer in the less-developed countries.

We have not asked ourselves whether the RF *should* continue its present programs in the developing countries, but rather *how much* of its efforts should be directed there, and to which countries and which problems they should be directed. I believe that at the very least the same proportion of our resource distribution should be maintained. More important, we should seek to widen our present cooperation with the major international banks and development agencies so as to compound our influence for the good. We can do this only if we maintain an energetic and sensitive staff of high quality, both in the field and in the New York offices. At the moment, we

have initiated new programs at the request of the governments of Indonesia, Brazil, and Zaïre, and are continuing established programs in Nigeria, Kenya, Tanzania, Colombia, Mexico, Thailand, and St. Lucia. Minimal programs but much goodwill exist in India, Turkey, and the Philippines. Finally, recognizing that the potential for conflict among nations is rising, the Trustees have authorized a new program entitled Conflict in International Relations (see pages 10-11 and 53-55).

HUMAN VS FINANCIAL RESOURCES

The Rockefeller Foundation is both a *granting* as well as an *operating* foundation, and this has strengthened its work. If one looks superficially at the major contributions of the Foundation over its more than sixty years of existence, one would have to conclude that the work of the field staffs in public health (the first thirty years) and agriculture (the next thirty years) was responsible for the most important successes. The RF's field staff has been and is characterized by its scientific and technical excellence, its sensitivity to people with diverse needs and cultures, its low visibility, and minimal presence.

The argument might then be made that *all* the resources of the RF should be deployed to direct operations through a much expanded field staff. But this could be countered with the results that have come from systematic grant-making, by the fellowship programs, by new institutions established, and existing ones strengthened.

On balance, a *small* field staff of high quality coupled with extensive grants to institutions and individuals seems to be the best method of operation.

A DOMESTIC FIELD STAFF?

But frequently during this period of review I have wondered why we have not been able or willing to try a similar combination of field staff and grants in the United States. The answers I have been given are that we don't need a domestic field staff because distances are small, the New York officers function as domestic field staff as well as granting agents, and that some organizations that presently work under RF grants might not welcome the change. This is understandable, but the question of a small domestic field staff, or of regional officers in the United States, deserves further study. It is interesting to me that The Rockefeller Foundation is more valued in India, Brazil, and Mexico than it is in our own country. Perhaps this is good, but the testimony leading to the Tax Reform Act of 1969 leads me to think that it is not. Minimal visibility in other countries has been matched by invisibility in the United States!

PROVEN STRATEGIES

In the developing countries, the *strategic cycle* of organizational and technical advice by professional program officers or field staff, followed by grants and an extensive program of study awards, and combined with or followed by institution-building, has been remarkably successful. It recognizes the ultimate, supreme value of educated and trained *individuals* to any society and reaffirms the fact that such individuals simply must have *institutions* if anything of quality is to endure. The final phase is the assumption of ongoing responsibility by the host government (or founding domestic group) coupled with the establishment of multilateral support, thereby allowing the Foundation to withdraw and apply its funds to other issues.

Nearly ten thousand men and women have been supported through the scholarship and fellowship program of The Rockefeller Foundation since its beginnings in 1917. If I had to name the one major contribution of greatest enduring value over the past sixty years I would have to point to the individuals encouraged and supported by study awards. I am of the carefully considered opinion that we should make more use of this mechanism in the United States, specifically in our programs in Equal Opportunity, Cultural Development, Quality of the Environment, Problems of Population, and Conflict in International Relations: I believe it is a means by which we can achieve maximal return of enduring value for minimal expenditure.

CONCENTRATION

The Rockefeller Foundation has been careful to focus over long periods of time on a few selected programs with well-defined goals. It has seldom been guilty of scatteration; it has maintained its integrity while resisting political pressures and passing fancies. In its contributions to public health and the medical sciences over its first thirty years, its wedding of the physical and natural sciences in its "middle period," its work in agriculture and the Green Revolution during the most recent thirty years, or in the Arts program over the past ten years—in all this the RF has maintained sharply focused programs which exemplify what a foundation should be. It has stuck to root causes and to the advance of knowledge.

Nevertheless, I believe we may be approaching the danger point as regards scatteration. On the international scene, what could be more important than economic development and improved nutrition through agriculture; the prevention of disease through public health; the stabilization of population; the reduction of illiteracy, ignorance, poor management, and unemployment through education; and the reduction of destructive conflict—for the sake of us all in an interdependent world? (Note that the

world spends \$200 billion annually on arms and \$8 billion for aid to developing countries!)

On the domestic scene, what is more important than equal opportunity for all, improving the quality of the environment, and the quality of life through the arts and humanities? I expect a cacophonous chorus of answers here on the subject of domestic priorities, such as the need for improved economic theory, the fairer distribution of wealth and income, and a revised welfare system; or the need for more and better public policy-makers and administrators; or the refinancing of the key institutions in the private sector (such as the private colleges and universities); or the special problems of women, or youth, or the elderly; or the problems of improving housing and transportation; or the need for a national health policy and improved delivery systems for health services; or the need to improve our system of government and its ability to plan; or the need for penal reform, the resolution of the drug problem, and so on. We have, in fact, reviewed each of these subjects and we have made an occasional grant in some. But, for a variety of reasons, including sticking to root causes and struggling to avoid spreading ourselves too thin, the presence of adequate support from the public sector, the presence of other foundations and their interests, we have not elected to make any of these concerns a major program of the Foundation, although we are continuing our study of some.

COMPOUNDING OUR INFLUENCE

I believe we must maintain and strengthen our domestic programs: unresolved issues remain in all of them. Yet our money power has been eroded both by inflation and by absolute increases in the costs of social and biological experimentation. This means that we must seek additional ways of compounding our influence through the quality of our work (and therefore our staff); by seeking new ways of becoming more visible and thus attaching more symbolic significance to our grants; new ways of influencing public policy and public recognition of problems; new ways of attracting other sources of money; new ways of turning over more rapidly our successfully supported experiments to other sources of support, both public and private; and new ways of working cooperatively with the various international agencies.

EVALUATION AND CRITIQUE

Rigorous evaluation of the appropriations we make to reach our stated goals is essential to improving the quality of our work. We are, however, in a particularly difficult position. First of all, we have to deal with widely differing paradigms. It is one thing to evaluate the goal of increased food

production, but quite another to evaluate improvement in the quality of life through support of the arts. Then, we must face the reluctance of many outside organizations and individuals to criticize us, to flog us with our failures, for fear of losing their welcome as future supplicants. (For every 550 successful grant applicants, there are over 7,000 turned down each year.) Finally, we deal with the complexities of multiple, interdependent variables that defy coherent analysis, and require the services of philosopher kings, presently in short supply. For instance: irrigation is good when it enhances crop production, but bad if it brings schistosomiasis, consolidation of small landholdings, mechanization with resulting unemployment, and rural-urban migration.

We need constant outside scrutiny and criticism. The general public too has every right and responsibility to criticize us, to be heard, and have an effect. The Trustees serve this function: their job is to set policy and represent the public interest in our work. There still remain a great many Americans who may have no view, or quite a different view, of us than we have of ourselves. It is they whom we are trying to reach, and are reaching through our new publication: *RF Illustrated*. In addition, through our new policy of opening our archives to any and all scholars and journalists—indeed, any interested groups or individuals with legitimate requests—we hope to enhance our exposure to constructive criticism and to achieve as high a level of accountability as possible.

GOVERNANCE

The role of the Trustees is a particularly important subject. They bear the ultimate responsibility for the quality of our work and the coherence of our means and ends. It was fashionable during the 1960's to criticize the faceless establishment, the men (and the absence of women) who governed universities, hospitals, schools, foundations, and businesses. Much of the criticism was justifiable, and much that was good emerged from the turmoil. During the past year, our own Trustees have given untold hours, freely and willingly, to the work of the Foundation. Each Trustee has offered much to the whole effort as well as contributing his and her own area expertise. Both the Chairman, Douglas Dillon, and I feel that the more active involvement of the Board is highly desirable.

WHERE WE CAME OUT:

Conquest of Hunger

The primary objective of The Rockefeller Foundation's *Conquest of Hunger* program is to accelerate rates of increase in food production in those countries where: yields per unit area are low and relatively static;

decreasing amounts of arable land per person are a cause of concern; the low income of rural people is a major barrier to improvement of standards of living and of national and social advance; and important national institutions need to be strengthened. Increased food production, however, is not an end in itself—it is the *means* to improved nutrition and health, and improved economic development, and these are the ultimate objectives of the program.

A related goal is to couple agricultural production on small farms with effective health care delivery and family planning programs, at costs the poorer nations can afford.

Still another objective is to identify new ways—such as aquaculture or production of single cell protein—by which growing world food needs may be met.

Recognizing the complexity and magnitude of the task ahead, the Foundation will seek to cooperate with other national, international and private organizations with similar concerns in devising new arrangements for more effective collaboration.

All of the before-mentioned objectives have another important goal: to buy time during which efforts toward stabilization of population growth may take effect.

Problems of Population

The primary emphasis will continue to be the acquisition of knowledge, its rapid transmission, and the institutionalization of research and training programs toward population stabilization and the improved delivery of health care. We will increase our efforts in public health abroad, emphasizing basic research in such diseases as schistosomiasis and trypanosomiasis, which affect literally hundreds of millions of people in tropical and semitropical areas. We are exploring the use of television in the regionalization of health services, and we are searching for opportunities to strengthen disciplines of tropical medicine and public health both in the United States and abroad. Most important, we have taken steps to bring a more active medical component into our other programs—nutrition within Conquest of Hunger, health within Quality of the Environment, the teaching of community medicine within University Development, and medical ethics within Cultural Development.

University Development

Our traditional University Development program will be continued in the less-developed countries, emphasizing the strengthening of institutions

that have the potential for serving as national or regional models. Particular attention has been given to the development of departments of agriculture, public health, medicine, and social sciences.

In addition, we will explore the interests of departments of education within universities. The problems of primary and secondary education in the less-developed countries become progressively more serious as their populations expand. Inordinately high attrition rates and inadequate curricula limit the number of qualified candidates for higher education. The universities are thus paralyzed by an inadequate learning foundation for their students. National needs cannot be adequately met unless national educational programs become the subject of intense study and improvement.

Another objective is the encouragement of university-based applied programs and extension activities on an experimental basis. When the university is developed to the extent that its departments are administered and staffed by its own people, such programs (which should be interdisciplinary in nature) will provide more rapid transmission of knowledge and skills to the real needs of the people. It will demonstrate that "ivory tower" excellence is not the sole objective of academic growth and development. Community needs and national problems *can* be addressed experimentally on an applied level by institutions of higher learning. A university's findings can be useful to other agencies responsible for developmental activities on a regional or national scale.

Conflict in International Relations

This new program will be directed toward the support of measures for the anticipation, avoidance, and resolution of conflicts that are likely to disrupt the international community, and the development of international institutions with greater capacity for dealing effectively with emerging issues of global interdependency. It underscores the reality that we live in an increasingly interdependent world and that the realization of other Foundation program objectives will depend to a large degree on the development of a more stable world order. The Conflict in International Relations program will seek to support:

- Institutions and organizations that have the capacity to carry out effective programs in the international relations–conflict resolution field. Particular attention will be given to projects analyzing the many issues and situations that have a high potential for generating destructive international conflict.

- Individuals whose previous background suggests that they would clearly benefit from a period of operational experience or ongoing research

as Rockefeller Foundation Fellows—in a program that would allow them to make further contributions to their fields.

- Task forces and study groups that have as their major purpose the identification of issues and programs in conflict avoidance.

- Efforts that are clearly aimed at encouraging the involvement in global affairs of civic and educational groups within the United States, and perhaps in some other nations as well. There is a pressing need for new educational efforts that will allow the individual to understand the complexities of an increasingly interdependent world, and encourage him to participate in the resolution of international conflict.

Equal Opportunity

The Foundation's primary objective in its Equal Opportunity program is to assist in the transformation of American institutions in order to make sure that the disadvantaged—specifically minority group members—are given equality of opportunity. Educational opportunities are absolutely central to this objective, and, either directly or through other organizations, we are presently supporting:

- The training of minority group individuals, through internships and other specially designed programs, for positions of responsibility and leadership.

- Community education/community development programs aimed specifically at involving a broad spectrum of community leaders in the development of their own skills; also opportunities for managing a wide range of pressing social problems, through educational and training programs.

- Policy-oriented research efforts that should provide guidance for alleviating some specific problems which confront the disadvantaged.

- Continuing explorations of unique opportunities in the equal opportunity field. The Foundation is giving specific attention to the plight of the disadvantaged in rural areas, and it is searching for new and effective ways to deal with the problems of institutionalized racism.

It is absolutely essential that The Rockefeller Foundation, with its long history of support to minorities, continue a vigorous and innovative program at a time when some other organizations have grown weary of such efforts and have reduced their support.

Cultural Development

The objectives of the Arts and Humanities programs can be summarized as follows:

- To stimulate significant work by creative artists.
- To broaden opportunities for their exposure and training.

- To engender acceptance of the creative artist; making the arts more central to general education is of primary importance.

- To promote increased international understanding through the Arts and the Humanities.

- In the Humanities, to increase both the number and quality of, and the opportunities for, persons working on problems of the human spirit. Support for the creative individual is of prime importance to this program.

- To enable humanistic scholars to extend their reach to new experiences and new dilemmas, and to encourage professionals in other fields to render explicit and critical the humanistic dimension of their own work.

- To make humanistic skills more accessible.

Quality of the Environment

The objectives of the program are to speed the identification and implementation of solutions to the more important and difficult national and international environmental problems, to create institutions which can deal with such problems effectively, and to establish valid grounds for increased public confidence that environmental abuses will be minimized. In accomplishing these objectives, a strategy has been developed that concentrates support in five areas:

- Testing the validity of a comprehensive, integrated, regional approach to environmental management within a defined geographic region (the Hudson Basin in New York State).

- Developing environmentally significant alternatives in the management of major pollutants, particularly the nutrients (nitrogen and phosphorus), pesticides, and heavy metals. This would include an improved understanding of their relationship to principal food chains.

- Assisting universities in their search for solutions to specific environmental problems that have major biological and/or social components, through the development of cooperative working relationships with state and federal agencies or other organizations.

- Assisting in the establishment of linkages among the world's institutions concerned with internationally important environmental problems—such as the quality of international waterways, transnational air quality, and environmental contamination by toxic substances.

- Developing an improved understanding of the nature and sources of public perceptions of environmental problems.

AND MOST IMPORTANT OF ALL

It has become obvious to all of us over the past year of intensive review that all our interests and programs are interrelated and interdependent:

increased food production and improved distribution will improve nutrition and health and enhance economic development which, in turn, will provide new resources with which to improve education in all its forms. All of which, in turn, will limit population growth—and allow further resources to be devoted to improving the quality of life by developing those institutions of health, education, welfare and social justice whose primary concern is the quality of living. A new concern for humanity, spawned by the knowledge of the interdependence of all people and nations, may bring new sanity to a troubled world which, while it roams the brink of hell, may yet find the causeway to peace.

Although the world will always need and value the expert and the professional, it demands new interdisciplinary approaches to problem-solving that recognize the interrelatedness and interdependence of all knowledge and of human welfare. In the microcosm of The Rockefeller Foundation, we are searching for new ways to bring our various experts into more fruitful tension with each other. We seem never to have enough time or money to do all the things we would like to do, and we live in a state of chronic frustration. The process of review and evaluation is a continuous one as we search for the best ways to use our limited resources to reach our goals. Our sixty-year history tells us that we have contributed something of value—and this drives us on.

What's past is prologue. Two favorite sayings express our mood at the moment: "It's later than you think!" and "The best is yet to come!"

JOHN H. KNOWLES, M.D.

December, 1973

THE ANNUAL REPORT

CONQUEST OF HUNGER

DEVELOPMENT OF THE INTERNATIONAL INSTITUTES

This system of eight institutes was greatly strengthened by continuing support (\$35 million for 1974) from the recently formed Consultative Group on International Agricultural Research whose permanent members include the three sponsors (World Bank, United Nations Development Programme, Food and Agriculture Organization), the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the European Development Fund; and the governments of 13 nations: Australia, Belgium, Canada, Denmark, Federal Republic of Germany, France, Japan, Netherlands, Norway, Sweden, Switzerland, United Kingdom and the United States. Also members are the International Development Research Centre of Canada, the Kellogg Foundation, the Ford Foundation, and The Rockefeller Foundation.

The five major developing regions of the world participate in the group through representative countries named by the FAO for two-year terms. At present these countries are Argentina and Brazil for Latin America, Morocco and Nigeria for Africa, the Philippines and Thailand for Asia and the Far East, Egypt and Pakistan for the Middle East, and Israel and Rumania for Southern and Eastern Europe.

(The eight institutes are the International Rice Research Institute in the Philippines, the International Maize and Wheat Improvement Center in Mexico, the International Center of Tropical Agriculture in Colombia, the International Institute of Tropical Agriculture in Nigeria, the International Crops Research Institute for the Semi-Arid Tropics in India, the International Laboratory for Research on Animal Diseases in Kenya, the International Livestock Center for Africa in Ethiopia, and the International Potato Center in Peru.)

The Consultative Group also established and funded an International Board of Plant Genetic Resources which will complete the collection of crop germplasm which, despite the thirty-year interest of the RF in this work, is neither worldwide nor complete.

REGIONAL PROGRAMS

The Inter-Asian Corn Program, centered in Thailand, continued its advisory services to corn programs in south and southeast Asia.

The Middle East Wheat Improvement Project, headquartered in Turkey,

is intensifying its cooperation with researchers in southeastern Europe, which has similar wheat problems. A surveillance program is being developed to monitor wheat diseases in the North Africa, Middle East, and India region.

STRATEGIES FOR RURAL DEVELOPMENT

A grant to the University of California financed a joint study of the Puebla Project in Mexico by the University, CIMMYT, and the Postgraduate College of the National School of Agriculture at Chapingo, Mexico, in order to help generate other projects benefiting small farmers.

As part of the University Development programs in Brazil and Thailand, integrated rural development projects (discussed in the preceding essay) are planned to begin in 1974.

RESEARCH AND TRAINING PRIORITIES

The Foundation's interest in research on food legumes (a staple of diet in many developing countries) which began 10 years ago was strengthened by a cooperative grant for research on field beans involving Cornell University, CIAT, and other U.S. and Latin American centers. Other grants for studies of field beans were given to Hokkaido University in Japan and Michigan State University. The FAO was aided in publishing proceedings of a symposium on "Nutritional Improvement of the Food Legumes by Breeding."

Another source of food, one that is high in protein and which the RF has been promoting the production of for ten years, is that of fish. A new grant in which the Foundation will cooperate with a number of private and public agencies will seek to coordinate scattered efforts into one Program on Aquatic Resources in the Pacific. Not only basic research but training of villagers and technological assistance to fishermen will be involved.

A grant to the University of Minnesota's Economic Development Center will be devoted to reaching a better understanding of the techniques used in Japan to raise agricultural output per unit of land area to levels that are exceptionally high by world standards.

STUDY AWARDS

COLOMBIA

ALARCON MILLAN, ENRIQUE M.S., Cornell University, 1971. Plant Breeding. Appointed from Colombian Institute of Agriculture. Place of study: U.S.A. S-AGR

MARTINEZ RACINES, CESAR POMPILIO M.S., University of the Philippines, 1971. Plant Breeding. Appointed from Colombian Institute of Agriculture. Place of study: U.S.A. S-AGR

RODRIGUEZ, MARIO SANTOS B.S., National University of Colombia, 1969. Agronomy, Soils. Appointed from Cornell University/CIMMYT Project in International Agriculture. Place of study: U.S.A. s-AGR

EL SALVADOR

ZOMETA MERINO, CARLOS ALFREDO B.S., University of Florida, 1970. Animal Nutrition. Appointed from University of El Salvador. Place of study: U.S.A. s-AGR

GUATEMALA

ALONZO PADILLA, FREDDY ROLANDO Ing.Agr., Monterrey Institute of Technology, 1972. Parasitology. Appointed from Institute of Science and Agricultural Technology. Place of study: Mexico. s-AGR

ARJONA, CARLOS ORLANDO Ing.Agr., San Carlos University of Guatemala, 1972. Pathology. Appointed from Ministry of Agriculture. Place of study: Mexico. s-AGR

MARTINEZ RODAS, ROMEO M.S., Cornell University, 1971. Agronomy. Appointed from San Carlos University of Guatemala. Place of study: U.S.A. s-AGR

SCHMOOCK PIVARAL, WERNER JORGE Ing.Agr., San Carlos University of Guatemala, 1971. Agronomy. Appointed from Institute of Science and Agricultural Technology. Place of study: Mexico. s-AGR

HONDURAS

CONTRERAS, MARIO RUBEN M.S., Cornell University, 1973. Plant Pathology. Appointed from Cornell University/CIMMYT Project in International Agriculture. Place of study: U.S.A. s-AGR

INDONESIA

JOEDORO SOEDARSONO Ir., Gadjah Mada University, 1963. Soil Science. Appointed from Gadjah Mada University. Place of study: U.S.A. s-AGR

NURSAMSI PUSPOSENDOJO Ir., Gadjah Mada University, 1970. Plant Pathology. Appointed from Gadjah Mada University. Place of study: U.S.A. s-AGR

OETOYO ATMOSUDIRDJO Ir., Gadjah Mada University, 1970. Economic Entomology. Appointed from Gadjah Mada University. Place of study: U.S.A. s-AGR

OSMAN, HUGO Dr.Vet.Med., Gadjah Mada University, 1966. Animal Husbandry. Appointed from Ministry of Agriculture. Place of study: U.S.A. s-AGR

SOEKANTO LEBDOSOEKOJO, R. M.S., Kansas State University, 1966. Animal Nutrition. Appointed from Gadjah Mada University. Place of study: U.S.A. s-AGR

KENYA

MUCHIRI, MANASSEH NDUNGU Vet.Sur., College of Agriculture, Poland, 1972. Veterinary Science. Appointed from Ministry of Agriculture. Place of study: U.S.A. s-AGR

MALAYSIA

SIVANASER, MURUGESU B.Sc., University of Malaya, 1965. Agronomy. Appointed from Department of Agriculture. Place of study: Philippines. s-AGR

MEXICO

ARANDA HERRERA, ENRIQUE M.S., Monterrey Institute of Technology, 1971. Economic Entomology. Appointed from Monterrey Institute of Technology. Place of study: U.S.A. S-AGR

BYERLY MURPHY, KEIR FRANCISCO M.S., National School of Agriculture, 1969. Entomology. Appointed from National Institute of Agricultural Research. Place of study: U.S.A. S-AGR

ESPARZA-BORGES, HEBERTO-JAVIER M.S., University of California, Davis, 1966. Veterinary Science. Appointed from National Institute of Livestock Research. Place of study: U.S.A. F-AGR

NAVARRO, ALFREDO R. M.Sc., Monterrey Institute of Technology, 1973. Plant Breeding. Appointed from Monterrey Institute of Technology. Place of study: U.S.A. S-AGR

ORTEGA MARTINEZ, ENRIQUE I. B.S., National Polytechnic Institute, 1969. Biochemistry. Appointed from CIMMYT. Place of study: U.S.A. S-AGR

NIGERIA

OLAYIWOLE, MICHAEL B. M.Sc., Kansas State University, 1971. Ruminant Nutrition. Appointed from Ahmadu Bello University. Place of study: U.S.A. S-AGR

PERU

CALDERON, GUIDO A. Ing.Agr., La Plata National University, 1964. Wheat Breeding. Appointed from Ministry of Agriculture. Place of study: Mexico. S-AGR

SENMACHE, JOSE MANUEL Ing.Agr., Northern Agricultural University, 1969. Entomology. Appointed from Ministry of Agriculture. Place of study: Mexico. S-AGR

THAILAND

THANOM DAO-NGARM M.Sc., Indian Agricultural Research Institute, 1965. Soil Science. Appointed from Ministry of Agriculture. Place of study: U.S.A. T-AGR

THONGCHAI TONGUTHAISRI M.Sc., University of Wales, 1969. Plant Breeding. Appointed from Ministry of Agriculture. Place of study: U.S.A. S-AGR

TURKEY

CELIK, NECATI B.S., Ankara University, 1963. Plant Pathology. Appointed from Wheat Research and Training Center. Place of study: U.S.A. S-AGR

UNITED STATES

GALT, DANIEL LEE M.P.A., Princeton University, 1973. Agricultural Economics. Appointed from Cornell University/CIMMYT Project in International Agriculture. Place of study: U.S.A. S-AGR

GRANTS AND PROGRAMS

The first column shows all grants and programs announced in 1973. The second column shows all expenditures in 1973 including expenditures on prior years' grants.

	GRANTS AND PROGRAMS	EXPENDI- TURES
International Cooperative Programs		
Field Staff	\$1,074,600	\$ 800,951
International conferences	59,500	
Production and distribution of publications	23,200	33,938
 AUSTRALIA		
Australian National University		
Development of high-lysine rice and wheat		14,720
 BRAZIL		
Fellowships and scholarships	7,050	24,242
 CANADA		
University of Waterloo		
Schistosomiasis research		26,260
 CEYLON		
Fellowships and scholarships	4,000	6,640
 CHILE		
Fellowships and scholarships	7,400	15,210
 COLOMBIA		
International Center of Tropical Agriculture (CIAT)		
Cooperative program with the Institute of Agricultural Science and Technology in Guatemala	84,057	72,057
Completion of headquarters facilities	490,570	1,725,226
General support	682,000	682,000
 University of Valle		
Improvement of protein quality in food plants in cooperation with the Colombian Institute of Agriculture and CIAT	28,000	5,880
 Fellowships and scholarships	114,010	99,635
 COSTA RICA		
Inter-American Institute of Agricultural Sciences		
Latin American Association of Plant Science, Secretariat support		5,000
 ECUADOR		
Cooperative program		
Ecuador Agricultural Project	3,000	4,002

National Agricultural Research Institute		
Program in crop and animal improvement		15,810
Fellowships and scholarships	8,490	4,028
EL SALVADOR		
Foundation for the Development of Cooperatives		
Increase of productivity of small farmers	17,585	17,787
Fellowships and scholarships	24,340	17,157
ETHIOPIA		
Fellowships and scholarships	31,435	40,115
GUATEMALA		
Fellowships and scholarships	32,370	15,896
HONDURAS		
Honduran Popular Cultural Action Program		
Training of paraprofessionals in its Agricultural Education Program	15,000	15,000
Pan American School of Agriculture		
Improvement of three-year diploma program	88,945	88,945
Fellowships and scholarships	7,890	2,465
INDIA		
Cooperative program		
Indian Agricultural Program		76,899
Fellowships and scholarships	4,640	14,790
INDONESIA		
Fellowships and scholarships	69,950	24,223
ISRAEL		
Hebrew University of Jerusalem		
Preparation of a handbook on construction of micro-catchment systems	12,500	6,250
ITALY		
Conference on Trypanosomiasis and East Coast Fever held at Bellagio Study and Conference Center	20,000	13,326
United Nations Food and Agriculture Organization		
Printing of proceedings of the symposium on "Nutritional Improvement of the Food Legumes by Breeding"	6,000	6,000
Training of Middle Eastern wheat specialists		70,908
University of Saint Thomas Aquinas		
Center for Social Training and Action	15,000	15,000

JAPAN		
Hokkaido University		
Field bean research	4,600	4,600
Kihara Institute for Biological Research		
Wheat and rice research		4,480
KENYA		
Animal disease laboratory	100,000	10,640
East African Agriculture and Forestry Research Organization		
Sorghum research—refund		(2,670)
International Centre of Insect Physiology and Ecology		
Research on the tsetse fly	66,000	66,000
Fellowships and scholarships	16,790	11,176
LEBANON		
Fellowships and scholarships	13,640	290
MALAYSIA		
Fellowships and scholarships	5,990	1,134
MEXICO		
International Maize and Wheat Improvement Center (CIMMYT)		
General support	1,500,000	1,200,044
International Potato Center		11,128
Central American Corn Improvement Project—refund		(2,456)
Puebla Project	117,523	117,523
Staff assigned to Middle East Wheat Improvement Project	84,480	84,238
National School of Agriculture		
Special institutional grant	5,250	5,250
University of Sonora		
Research on agricultural systems and crop yields		28,078
Fellowships and scholarships	110,490	78,121
NIGERIA		
International Institute of Tropical Agriculture (IITA)		
General support	1,064,000	903,300
Fellowships and scholarships	15,700	12,001

PERU		
Fellowships and scholarships	17,380	27,013
International Potato Center (CIP)		
Operating costs of Mexican Regional Program	2,175	55,625
PHILIPPINES		
International Rice Research Institute (IRRI)		
General support	620,000	620,000
Improvement of productivity of marginal rice farmers	24,250	24,250
World collection of rice germplasm	23,200	32,200
University of the Philippines		
Special institutional grant	1,500	1,500
Fellowships and scholarships	9,830	6,910
SIERRA LEONE		
Njala University College		
Research on rural employment in Sierra Leone	16,000	
SUDAN		
Agricultural Research Corporation		
Wheat improvement program		5,346
TAIWAN		
Asian Vegetable Research and Development Center		
Mung bean research	25,000	25,000
THAILAND		
Chiang Mai University		
Malnutrition research	12,000	6,603
Cooperative program		
Inter-Asian Corn Program	58,900	34,317
Kasetsart University		
Mae Klong rural development project	35,000	
Study of the protein quality of rice—refund		(1,659)
Mahidol University		
Nutrition research	14,800	22,758
Research on aflatoxin-producing molds		5,668
Research on malnutrition and resistance to infection		7,261
Study of metabolic research units in the Western Hemisphere	3,100	3,100
Fellowships and scholarships	52,365	54,668

TURKEY**Cooperative program**

<i>Colorado</i>		
Colorado State University		
Special institutional grant	6,000	6,000
Society for Range Management		
Program on range ecology and pasture management in Argentina	6,700	
<i>District of Columbia</i>		
American Freedom from Hunger Foundation		
Leadership training	15,000	15,000
Andean Foundation		
Program to strengthen marginal farmer groups in the Andean region	15,000	15,000
Center for Community Change		
Establishment of an education division	15,000	15,000
National Academy of Sciences		
Operation of its agricultural board	20,000	20,000
Study of agricultural efficiency in the United States		25,000
<i>Florida</i>		
American Agricultural Economics Association		
Review of U.S. training and research in the economics of agriculture in developing countries	15,000	
University of Florida		
Special institutional grant	3,750	3,750
University of Miami		
Special institutional grant	1,500	1,500
<i>Georgia</i>		
Southern Regional Council		
Study of Charles K. Mann: "Taste, Technology, and the Government"	7,850	7,850
University of Georgia		
Special institutional grant	1,500	1,500
<i>Hawaii</i>		
East-West Center		
Study of fisheries-related problems of the Pacific region		4,800
University of Hawaii		
Special institutional grant	1,500	1,500

<i>Illinois</i>		
University of Chicago		
Research on economic effects of varying agricultural policies		11,126
University of Illinois		
Research on a livestock parasite	250,000	
Research on sorghum plant crosses	14,000	14,000
Special institutional grant	3,000	3,000
<i>Indiana</i>		
Indiana University		
Research on infant mortality in underdeveloped countries		12,150
Research on the relation between protein depletion and infant mortality in underdeveloped countries	14,265	14,265
Purdue University		
Special institutional grant	6,000	6,000
<i>Iowa</i>		
Iowa State University		
Special institutional grant	3,750	3,750
<i>Kansas</i>		
Kansas State University		
Research on broad cereal crosses	21,000	12,000
<i>Louisiana</i>		
Louisiana State University and Agricultural and Mechanical College System		
Special institutional grant	3,750	3,750
<i>Massachusetts</i>		
Harvard University		
Studies of insect growth regulators	85,000	85,000
Symposium on the origin of maize	1,600	1,600
Massachusetts Institute of Technology		
Establishment of an international nutrition center		75,447
<i>Michigan</i>		
Michigan State University		
Field bean research	51,000	51,000
Special institutional grant	3,750	3,750
University of Michigan		
Medical malacology program		28,186

<i>Minnesota</i>		
University of Minnesota		
Research on frost resistance in basic food crops		10,614
Research on Minnesota agriculture, 1880-1970	10,000	11,500
Research on small farming in Japan	12,800	11,506
Special institutional grant	4,500	4,500
 <i>Missouri</i>		
Saint Louis University		
International Center for Research and Training in Nutritional Diseases, Chiang Mai, Thailand		25,189
 University of Missouri		
Fourth International Wheat Genetics Symposium	20,000	20,000
 <i>Nebraska</i>		
University of Nebraska		
Research on modification of tropical corn germplasm		16,925
Sorghum research		99,409
Special institutional grant	4,500	4,500
 <i>New York</i>		
Agribusiness Council		
Conference on science and agribusiness in the 1970's	15,000	10,000
 Citizens Commission for Science, Law, and Food Supply		
Program of research and analysis of the economic, legal, and health aspects of food additives	25,000	25,000
 Columbia University		
Artificial upwelling project for fish breeding—refund		(2,168)
 Cornell University		
Improvement of yield in dry beans	28,624	
Research on cold tolerance in maize		7,468
Research on insect-plant juvenile hormones	25,400	
Special institutional grant	7,500	7,500
Studies of insect pheromones and control of pests	25,000	
 New York Botanical Garden		
Research with CIAT on problems of the Amazon Basin	484	
 Rockefeller Foundation—New York program expenses		
	790,300	739,993
 Rockefeller University		
Schistosomiasis research—refund		(1,379)
Tsetse fly research	27,550	

<i>North Carolina</i>		
North Carolina State University		
Rice blast disease research	10,000	10,000
Special institutional grant	2,250	2,250
<i>North Dakota</i>		
North Dakota State University		
Special institutional grant	1,500	1,500
<i>Oklahoma</i>		
Oklahoma State University		
Special institutional grant	3,750	3,750
<i>Oregon</i>		
Oregon State University		
Middle East Wheat Improvement Project	69,700	64,099
Special institutional grant	7,500	7,500
<i>Rhode Island</i>		
Gordon Research Conferences		
Conference on plant culture at the Bellagio Study and Conference Center		3,946
<i>Texas</i>		
Texas A & M University System		
Special institutional grant	3,750	3,750
<i>Utah</i>		
Utah State University		
Livestock research projects in the State of Zacatecas, Mexico		2,490
<i>Virginia</i>		
Virginia Polytechnic Institute		
Special institutional grant	2,250	2,250
<i>Washington</i>		
Washington State University		
Research on nutritional quality in cereal crops and legumes		15,000
Special institutional grant	1,500	1,500
<i>Wisconsin</i>		
Medical College of Wisconsin		
Project to breed corn resistant to insect attack	12,000	12,000

University of Wisconsin		
Center for Research on the Economic and Social Impact of Disease—refund		(666)
Research on the possible deleterious effects of high-lysine corn	8,500	
Study: "Microeconomic Decisions and the Long-Run Development of Agriculture"	6,831	
Special institutional grant	3,750	3,750
 <i>United States—General</i>		
Fellowships and scholarships	21,380	4,445
Miscellaneous small payments or refunds each under \$500		(302)
TOTAL	<u>\$8,935,509</u>	<u>\$9,353,308</u>

PROBLEMS OF POPULATION

Our efforts last year toward achieving a greater measure of worldwide population control and improved health were aimed chiefly at continuing and strengthening means already well under way and proven worthwhile while adding new ideas and engaging the work of new people.

For instance a third conference of governmental and international foreign aid societies was held at the Bellagio Center. At this meeting a small committee of experts was formed to provide agencies with up-to-date information during the year on the status of specific activities throughout the world.

The third year of worldwide competition for the Ford-Rockefeller awards in social science/legal research on population resulted in twenty-six awards, of which fourteen were by the RF, their subjects ranging from the effect of welfare payments on fertility to boy preference in Korea.

Three allocations related to population were made under a 1971 grant for support of research on unemployment and human resource utilization. Typical was one for a study of the relationship between fertility and work opportunities for women in Venezuela.

As always grants for primary and applied research in reproductive biology were a main thrust. Last year continued support was given to the Population Council's International Committee for Contraception Research. Investigation is being centered now on determining what size and shape of intrauterine device would provide highest protection against pregnancy with the least side effects. Those containing a chemical, usually a progestin, seem at present to offer the most promise. In all the committee has clinically tested 39 chemical compounds and 14 devices.

A group at Colorado State University was aided in a study of the corpus luteum in ewes. Since the corpus luteum is a cyclic ovarian structure responsible for the early maintenance of pregnancy, the possibility of inhibiting its function by chemical or immunological agents holds great promise for fertility control.

Three new basic science professorships in departments of obstetrics and gynecology were supported at Washington and Cornell universities and the University of Pennsylvania, bringing the total to ten. Seven special post-doctoral research fellowships in reproductive biology were awarded.

In the field of education and training, grants through various organizations were given for the incorporation of population education in primary and secondary schools here, and in medical schools abroad. A program for the training of nurses as providers of family planning services also received continued support.

STUDY AWARDS

UNITED STATES

- DYM, MARTIN Ph.D., McGill University, 1969. Reproductive Biology. Appointed from Harvard University. Place of study: U.S.A. F-BMS-RB
- GUNSALUS, GLEN Ph.D., Clark University, 1972. Reproductive Biology. Appointed from Clark University. Place of study: U.S.A. F-BMS-RB
- LASLEY, BILL LEE Ph.D., University of California, Davis, 1972. Reproductive Endocrinology. Appointed from University of California, San Diego. Place of study: U.S.A. F-BMS-RB
- MILLER, WILLIAM Ph.D., Cornell University, 1970. Reproductive Biology. Appointed from Walter Reed Medical Center. Place of study: U.S.A. F-BMS-RB
- RICHARDS, JOANNE STEWART Ph.D., Brown University, 1970. Reproductive Biology. Appointed from University of Michigan. Place of study: U.S.A. F-BMS-RB
- TSAI, ALBERT YUAN-MIAO M.D., University of Chicago, 1968. Reproductive Biology. Appointed from Johns Hopkins University. Place of study: U.S.A. F-BMS-RB
- WARNOCK, DAVID H. Ph.D., University of Illinois Medical Center, 1969. Reproductive Biology. Appointed from Max-Planck Institute for Experimental Medicine. Place of study: U.S.A. F-BMS-RB

GRANTS AND PROGRAMS

The first column shows all grants and programs announced in 1973. The second column shows all expenditures in 1973 including expenditures on prior years' grants.

	GRANTS AND PROGRAMS	EXPEN- TURES
International Cooperative Programs		
International conferences	\$ 20,400	\$ 7,253
Production and distribution of publications	8,400	16,528
 ARGENTINA		
National University of Cordoba		
Research in reproductive biology		1,440
 BELGIUM		
International Union for the Scientific Study of Population		
Research on population policies	10,000	10,000
 BRAZIL		
Federal University of Bahia		
Study of utilization of human resources in urban-marginal areas of Northeast Brazil	23,000	23,000
 Federal University of Ceara		
Study of human resource utilization in urban-marginal areas of Northeast Brazil	31,000	31,000
 CANADA		
Queen's University		
Research in reproductive biology		47,800
 CHILE		
Latin American Center of Demography		
Research on population policies		8,195
 COLOMBIA		
University of the Andes		
Research on technology and employment	23,400	12,500

UNIVERSITY DEVELOPMENT

Three grants during 1973 illustrate the several phases of the RF's program in higher education abroad. A grant to the Federal University of Bahia in Brazil initiated a university development program that is expected to continue for some years. On the other hand, a three-year grant carried the three universities in Thailand toward termination of Foundation involvement. However, this grant also provided funds for convening meetings of other possible donor agencies that may furnish additional support before and after 1976.

A grant was made to the University of Ibadan, with which the RF is also terminating its involvement, to initiate an outreach program in rural development.

A significant broadening of the entire University Development program was made at a conference convened by the RF at its Bellagio Center of heads of international assistance agencies and leaders from the developing countries. As a result, two important undertakings were initiated in which various assistance agencies including the RF will cooperate.

One is a study of universities in twelve Latin American countries to discover what are the effects of education on economic status, and what factors determine who gets how much education.

The other is being carried out by a working group of representatives from both developed and developing countries who are making first-hand investigations of representative universities in the developing countries of Asia and Africa as well as Latin America.

STUDY AWARDS

BRAZIL

LOUREIRO, SEBASTIAO A. M.D., University of Bahia, 1964. Preventive Medicine. Appointed from University of Bahia. Place of study: U.S.A. F-BMS

SOARES, FABRICIO VASCONCELLOS M.A., University of Southern California, 1965. Management and Administration. Appointed from Federal University of Bahia. Place of study: U.S.A. s-ss

COLOMBIA

BERMEO, DANIEL M.D., Universidad del Valle, 1964. Population Control. Appointed from Universidad del Valle. Place of study: U.S.A. F-BMS

CRUZ CARDONA, VICTOR EULER B.A., Our Lady of the Lake College, Texas, 1969. Language Teaching. Appointed from Universidad del Valle. Place of study: U.S.A. S-HUM

GARZON G., GUILLERMO M.S., Purdue University, 1968. Inorganic Chemistry. Appointed from Universidad del Valle. Place of study: U.S.A. s-BMS

MILLAN, JAIME M.S., Universidad del Valle, 1973. Physics. Appointed from Universidad del Valle. Place of study: U.S.A. s-BMS

VALDERUTEN, RAUL B.S., National University of Colombia, 1970. Agricultural Engineering. Appointed from Universidad del Valle. Place of study: U.S.A. s-BMS

VARGAS, RUBEN M.Sc., University of Puerto Rico, 1969. Physics. Appointed from Universidad del Valle. Place of study: U.S.A. s-BMS

INDONESIA

SARWONO PUSPOSAPUTRO M.A., Gadjah Mada University, 1971. History. Appointed from Gadjah Mada University. Place of study: United Kingdom. s-ss

KENYA

CALLEB, BENJAMIN O. M.S., University of Illinois, 1971. Applied Mathematics. Appointed from University of Nairobi. Place of study: U.S.A. s-BMS

CHEGE, FRED E. M.A., University of Nairobi, 1973. Agricultural Economics. Appointed from University of Nairobi. Place of study: U.S.A. s-ss

GATHUMA, JOSEPH MWANGI M.Sc., University of Nairobi, 1973. Veterinary Pathology. Appointed from University of Nairobi. Place of study: U.S.A. s-AGR

MANUNDU, MUTSEMBI B.A., University of Nairobi, 1973. Economics. Appointed from University of Nairobi. Place of study: U.S.A. s-ss

NYAGA, PHILIP NJERU B.V.Sc., University of Nairobi, 1973. Veterinary Microbiology. Appointed from University of Nairobi. Place of study: U.S.A. s-AGR

OMUSE, JOHN KARANI M.Sc., University of Nairobi, 1973. Veterinary Science. Appointed from University of Nairobi. Place of study: U.S.A. s-AGR

WASIKHONGO, JOAB B.A., Makerere University, 1972. Sociology. Appointed from University of Nairobi. Place of study: U.S.A. s-ss

WESONGA, WEKESA MOSES M.A., University of Notre Dame, 1972. Economics. Appointed from University of Nairobi. Place of study: U.S.A. s-ss

NIGERIA

AKEN'OVA, MICHAEL EGHOSA B.Sc., University of Ibadan, 1969. Plant Breeding. Appointed from University of Ibadan. Place of study: U.S.A. s-AGR

ANOSA, VICTOR D.V.M., University of Ibadan, 1972. Veterinary Pathology. Appointed from University of Ibadan. Place of study: United Kingdom. s-AGR

AROWOLO, CHRISTOPHER OLUSEGUN LL.B., University of London, 1965. Educational Administration. Appointed from University of Ibadan. Place of study: U.S.A. s-ss

EGUNJOBI, JAMES KOLAWOLE Ph.D., Victoria University of Wellington, New Zealand, 1967. Ecology. Appointed from University of Ibadan. Place of study: U.S.A. F-AGR

OLWE, OLUKAYODE M.A., Indiana University, 1972. Sociology. Appointed from University of Ibadan. Place of study: U.S.A. s-ss

TANZANIA

BUBERWA, LAWRENCE GABRIEL B.Comm., University of Nairobi, 1971. Business Administration. Appointed from University of Dar es Salaam. Place of study: U.S.A. s-ss

RWEGASIRA, SALVATOR PETER K. B.Comm., University of Nairobi, 1972. Business Administration. Appointed from University of Dar es Salaam. Place of study: U.S.A. s-ss

SHUNDA, JOHN P. W. B.A., University of Dar es Salaam, 1971. Business Administration. Appointed from University of Dar es Salaam. Place of study: U.S.A. s-ss

THAILAND

BORNWORNTRI CHIRARATTANANON B.E., Chulalongkorn University, 1972. Economics. Appointed from Chulalongkorn University. Place of study: U.S.A. s-ss

CHIRA HONGLADAROM M.Sc., University of Wisconsin, 1970. Economics. Appointed from Thammasat University. Place of study: U.S.A. s-ss

CHIRAVAT SADAVONGVIVAD Ph.D., University of Pennsylvania, 1969. Pharmacology. Appointed from Mahidol University. Place of study: U.S.A. F-BMS

PICHAJ KANIVICHAPORN M.A., Thammasat University, 1973. Economics. Appointed from Thammasat University. Place of study: U.S.A. s-ss

CONFLICT IN INTERNATIONAL RELATIONS

Five fellows were appointed this year to the experimental Fellowship Program in International Affairs and more are expected to be appointed early in 1974.

A grant was made to MIT toward the costs of an international workshop, under the direction of Carroll Wilson, on energy options for the 1980's.

Funds were also approved for allocation to international organizations to analyze the implications of climate modification for international affairs.

The Institute for World Order received a grant for the establishment of university-based world order studies. A grant of \$500,000 was made to the Overseas Development Council for its program of research on the problems of developing countries.

GRANTS AND PROGRAMS

The first column shows all grants and programs announced in 1973. The second column shows all expenditures in 1973 including expenditures on prior years' grants.

EQUAL OPPORTUNITY

This program has stressed three main approaches to the problems of the disadvantaged which have been followed in previous years.

In the first of these, leadership development, ten minority group members served as interns with well-known school superintendents in a fellowship program for experienced school administrators. This brings to 39 the

total for the four years of the administrative internship program; most previous interns now hold highly responsible positions. A grant was made to continue this program for another two years.

A similar program, in which high school teachers, counselors, and others worked with successful high school principals was particularly successful in Washington, D.C. and Los Angeles.

Because of the success of these first two projects, two similar programs were initiated this year: one for training staff for government-funded assistance programs (five of these human resources interns are now serving with agencies in Washington, D.C.) and a second for training community college administrators.

The second approach was to make school systems responsive to the needs of their communities. In the Oakland (California) Unified School District, which has received Foundation support since 1971, Master Plan Citizens Committees have been formed and are at work at each of the city's 91 schools. They include students, teachers, and representatives of labor, industry, and community organizations. A second grant this year will stress continued effort to obtain more involvement on the part of all these groups as well as presentation to the Board of Education of suggested new policies and programs.

During the past three years grants to the Kenwood-Oakland (Chicago) Community Organization have helped train 134 community organizers who have actively engaged the residents in efforts to alleviate problems, not only in education, but in all areas involving social justice. Their efforts will be continued through a recent grant.

A school-community program in New Orleans moved ahead on schedule during the year, with three out of seven community districts now organized.

Large grants were given in December to the Baltimore City Public Schools and the Newark Board of Education for similar school-community projects.

Our third major interest, research on inner-city problems, was supported by a major grant (among others) to the Urban Institute in Washington, D.C. for an ethnic minorities research project—under the direction of Dr. Thomas Sowell, a black economist—under which various American minorities will be studied on a comparative basis.

GRANTS AND PROGRAMS

CULTURAL DEVELOPMENT

THE ARTS

Two major new undertakings were begun this year. The first is concerned with examining the teaching of the arts in public elementary and secondary schools throughout the United States. The necessity for such a study has been emphasized by many including Charles E. Silberman who has said: "Most schools give their students a powerful and effective esthetic education: they teach them that interest in the arts is effeminate or effete, that study of the arts is a frill and that music, art, beauty and sensitivity are specialized phenomena that bear no relation to any other aspect of the curricula of life. . . ."

The second was the American Music Recording Project planned in connection with the nation's bicentennial. This year was occupied with setting the stage for this ambitious project. It is expected that about 100 recordings will be made of American music from colonial times to the present—music that has either never been recorded or that has been dropped from catalogues. The recordings, which will represent the contributions of Americans of many backgrounds to our common culture, will be distributed to schools and departments of music, libraries, and FM radio stations.

Continuing the Foundation's commitment to the individual artist, eight playwrights were given stipends of \$8,500 each and short residencies at

theatres of their choice. The New York Shakespeare Festival was also helped to undertake the operation of theatre at Lincoln Center and to begin a program for new playwrights at the Vivian Beaumont Theater.

As part of its traditional support, also, of creative institutions, the Foundation continued its aid to the Agnes de Mille Dance Theatre, a choreographer's company emphasizing the heritage of American folk and ethnic dance, which has begun its first season of touring.

THE HUMANITIES

One of the Foundation's major expectations in the years ahead is a considerably expanded program in the humanities. Our goals, and some of the means for working toward them, have been described in the opening essay.

The year 1973 was necessarily a time of transition: most of the grants made can be thought of as supporting efforts to understand the several heritages of Americans. Various facets of the history of women are being explored at a few centers of higher education; in others, relatively neglected scholarly tools such as film and oral history are being used to document our cultural heritage. A number of awards were made for individual projects dealing with local or regional socio-historical phenomena—the life of a Polish-American community in Detroit, and the usefulness of Appalachian studies in the mountain regions, for instance.

The place of values in contemporary life is a newer interest for this program. The Institute of Society, Ethics, and the Life Sciences is developing, with the help of an RF grant, a research and teaching program to bring the humanities into the life sciences. And nine scholars received individual awards to complete studies, many of which deal with the values of people outside established systems.

Another new interest—making the humanities more widely used and useful—resulted in a grant to the University of Massachusetts to develop a program on philosophy and the humanities to be used in high schools, and another to the American Humanist Association to develop a film series.

The year 1974 should see considerable work supported within the areas outlined in this review.

ELLER, RONALD D. M.A., University of North Carolina, 1973. History. Appointed from University of North Carolina. Place of study: U.S.A. SUM

GRANTS AND PROGRAMS

The first column shows all grants and programs announced in 1973. The second column shows all expenditures in 1973 including expenditures on prior years' grants.

	GRANTS AND PROGRAMS	EXPENDI- TURES
UNITED STATES		
<i>Arizona</i>		
University of Arizona		
Editing of "Hamlin Garland and the American Indian, 1815-1910"	\$ 4,318	
<i>California</i>		
Bay Area Educational Television Association		
Training programs of the National Center for Experiments in Television		\$100,000
California Wind Symphony Association		
Workshops and performances	25,000	25,000
Center Theatre Group of Los Angeles		
Residency of Michael Weller, playwright	10,000	10,000
Programs of the Mark Taper Forum		75,000
De Young Museum Art School		
Training in museum education	188,000	49,000
East-West Players		
Playwright-in-residence	7,000	3,500
Magic Theatre		
Playwright-in-residence	3,500	3,500
Mills College		
Center for Contemporary Music		50,000
Provisional Theatre Foundation		
Playwright-in-residence	3,500	3,500
Salk Institute for Biological Studies		
Workshops concerning the humanistic aspects of aging	25,000	
San Francisco Conservatory of Music		
Awards to talented students	85,000	28,000
Community music education		76,500
San Francisco Theological Seminary		
To enable John Fry to complete three writing projects	13,500	13,500
University of California		
<i>Berkeley</i>		
Research on women in American history	89,000	16,500

<i>Los Angeles</i>		
Graduate Dance Center		22,666
<i>San Diego</i>		
Center for Music Experiment and Related Research		68,038
University of Southern California		
West Coast Branch of the Congress of Strings	35,000	35,000
<i>Colorado</i>		
Music Associates of Aspen		
Program of advanced teacher training		20,000
University of Denver		
Professional program in theatre		60,000
<i>Connecticut</i>		
Connecticut Players Foundation (Long Wharf Theatre)		
Residency of Susan Yankowitz, playwright	10,000	10,000
Eugene O'Neill Memorial Theater Center		
National playwrights conference and its National Theater Institute	390,000	80,000
Yale University		
Oral history interviews with musicians		24,000
Residency of Lanford Wilson, playwright	10,000	10,000
School of drama		112,500
<i>District of Columbia</i>		
National Endowment for the Humanities		
Jefferson Lecture in the Humanities—refund		(2,527)
<i>Georgia</i>		
Southeastern Academy of Theater and Music		
New educational and creative projects in theatre	80,000	80,000
Playwright-in-residence	3,500	3,500
<i>Hawaii</i>		
University of Hawaii		
Asian-American studies project	124,000	
<i>Illinois</i>		
Columbia College		
Establishment of a southern cultural exchange center	24,000	24,000
Community Arts Foundation		
Playwright-in-residence	3,500	3,500
University of Chicago		
Composition and performance of contemporary music		9,904

*Iowa***University of Iowa**

Courses in filmmaking and the American heritage		30,000
Expansion of its center for the new performing arts		40,000
Exploration of sex-role stereotyping	77,000	77,000

*Kentucky***Berea College**

Puppetry Caravan for Appalachia	51,800	18,380
---------------------------------	--------	--------

Theatre workshop	3,817	3,817
Juilliard School of Music		
Awards to talented students	265,000	96,000
Drama division	380,000	

LaMama Experimental Theatre Club		
Residency of Adrienne Kennedy, playwright	9,500	
Resident troupes		75,000
Manhattan School of Music		
Awards to talented students	100,000	38,485
Experimental program of string instrument training with Eleanor Roosevelt Junior High School		25,000
Manhattan Theatre Club		
Development of a new program in theatre	10,000	10,000
Martha Graham Center of Contemporary Dance		
Support of fall tour	20,000	20,000
Metropolitan Museum of Art		
Training in museum education	350,000	75,000
National Black Theatre Workshop		
Development of a new work	15,000	
National Friends of Public Broadcasting		
Operating costs	15,000	15,000
Negro Ensemble Company		
Residency of Martie Evans-Charles, playwright	9,500	9,500
New School for Social Research		
Study of the bases of ethical reaction vis-à-vis the new technology	15,000	
New York Public Library		
Cataloguing materials for dance collection bibliography	7,500	7,500
Establishing an index of new musical notation		10,004
Microfilming Velazquez collection to make it available to the Spanish-speaking community in the south Bronx	14,024	14,024
New York Shakespeare Festival		
Creation of new ballets	35,000	
Program at Lincoln Center	350,000	175,000
Public Theater		242,500
Residencies of John Ford Noonan and Edgar White, playwrights	19,000	9,500
New York University		
Graduate performing ensembles in theatre		100,000
Open Theatre		
Residency of Jean-Claude van Itallie, playwright	9,500	9,500
Paper Bag Players		
Educational theatre for children		30,000

P.E.N. American Center		
To permit Jan Benes to devote full time to writing	11,000	11,000
To permit talented writers to study lesser-known languages	10,000	
Preliminary Committee on the Design of American Music Recording Project	30,000	18,730
Program for American Playwrights		
Committee evaluating playwrights-in-residence program	15,000	1,075
Rabbit Hole Theatre		
Playwright-in-residence	3,500	3,500
Repertory Theater of Lincoln Center		
Support of 1972-73 season		25,000
Rockefeller Foundation—New York program expenses	391,600	283,921
St. Felix Street Corporation		
Brooklyn Academy of Music's activities in music, dance, and drama		125,000
Sarah Lawrence College		
Graduate training in women's history	140,000	52,000
Saratoga Performing Arts Center		
Residency of City Center Acting Company and expansion of the school program	15,000	15,000
State University of New York at Buffalo		
Participation of Indian students in a historical project on Allegheny reservation of the Seneca nation	6,000	
Street Theatre		
Workshops in prisons	20,000	20,000
Theatre Incorporated		
Sideshow program of the New Phoenix Theatre	24,600	24,600
Union Theological Seminary		
Investigation of the social context of theology in the language and thought of black Americans	13,658	13,658
North Carolina		
Duke University		
Oral history research on the South since 1890		80,000
Study on "Politics of the South: The Second Reconstruction" to be conducted at the Institute of Policy Sciences and Public Affairs	24,000	24,000
North Carolina School of the Arts		
Resident professional dance company		100,000
Ohio		
Cleveland Institute of Music		
Awards to talented students	75,000	50,000

Institute for the Development of Educational Activities		
Study of the arts in precollegiate education	100,000

Experimental series of music workshop festivals in Appalachian states	24,890	24,890
Concord College		
Survey of the usefulness of the Appalachian studies project	14,932	14,932
Wisconsin		
University of Wisconsin		
Dictionary of American Regional English	65,000	

<i>General</i>			
Fellowships and scholarships		15,415	290
Miscellaneous small payments or refunds each under \$500			(114)
TOTAL		<u><u>\$5,810,823</u></u>	<u><u>\$4,911,191</u></u>

QUALITY OF THE ENVIRONMENT

Although the geographical boundaries of some may encompass only a single city, all of the projects under way in this program have worldwide implications.

Modest support to Citizens for Clean Air in New York City, for instance, stimulated wide public participation in the State Public Service Commission's year-long hearings on energy conservation measures and their relation to the environment.

Three regional projects are of particular importance. One is the Hudson River Basin Project which began in the summer of 1973 and now involves the collaboration of more than twenty institutions and ten task groups. Over 1,200 local decision-makers are being interviewed to learn the attitudes toward environmental issues that prevail in the communities concerned.

The University of Florida was given a grant for an experiment that, it is hoped, will add much-needed fresh water to the state's supply. Partially treated municipal sewage will be piped into the headwaters of small cypress swamps. If the experiment works as expected, the polluted water will be purified and made available for consumption in its slow progress seaward by the plant and animal life of the swamps.

At Michigan State University effluent from a secondary sewage treatment plant which would otherwise be discharged into Lake Michigan will be diverted through four lakes in which it, too, will be purified by plant and animal life.

Helpful to many countries will be progress made in continuing efforts to find alternatives to DDT and similar pesticides that remain in the water and

air, some of them for as much as ten years, destroying many forms of animal life and sometimes human life as well. This progress has included the results of seven years of work aimed at interfering with the mating of selected insects through directed use of pheromones (sex attractants) at the University of California at Berkeley and at Riverside, and at Cornell University. This year a grant was made to the State University of New York's College of Environmental Science and Forestry at Syracuse toward studies of the components of the insect trail pheromone. At the three universities first named and the University of Illinois long-term efforts have resulted in the discovery of a number of new products that are highly effective against target insects but quickly disintegrate and do not accumulate in food chains.

A grant this year to Harvard University, to be carried out by Dr. Carroll M. Williams of the Biological Laboratories, produced exciting progress in work on the use of juvenile hormones to prevent insects from reaching the mating stage. Considerable results were also obtained from a grant made in 1970 to Texas A & M University, Mississippi State University, and the University of California at Davis in development of plant resistance to insects.

Of immediate international scope was a grant to the International Institute of Environmental Affairs for study and action programs concerned with the law of the sea.

GRANTS AND PROGRAMS

The first column shows all grants and programs announced in 1973. The second column shows all expenditures in 1973 including expenditures on prior years' grants.

	GRANTS AND PROGRAMS	EXPENDI- TURES
CANADA		
Arctic Institute of North America		
Establishment of a mediation procedure related to the extraction of Arctic fossil fuel resources	\$ 5,000	\$ 5,000
University of British Columbia		
Analysis of arrangements for management of international inland water resources	25,000	25,000
SWEDEN		
International Federation of Institutes for Advanced Study		
Support of operation	15,000	15,000
UNITED STATES		
<i>Alaska</i>		
University of Alaska		
Twenty-fourth Alaskan science conference on climate of the Arctic	7,200	7,200

Arizona

University of Arizona

Industrial gases detoxification		10,868
Report on power/water/food project		8,000

California

Claremont Colleges

Faculty-student investigations of electric power, mass transit, and land use	10,000	10,000
--	--------	--------

University of California

Berkeley

Research on pesticides	43,000	43,000
------------------------	--------	--------

Davis

Division of Environmental Studies		83,299
Study of plant resistance to insects	26,318	26,318

Riverside

Research on pesticides	43,200	43,200
Research on insect pheromones	3,926	3,926

Colorado

Colorado State University

Establishment of a 250-year record of the concentration of heavy metal contaminants in the environment	24,000	19,200
--	--------	--------

Rocky Mountain Center of Environment

Environmental intern program	15,000	10,000

Resources for the Future

Research on management of residuals		245,897
Analyzing the relation between population, resources, and the environment in the less-developed nations	175,000	

Florida

University of Florida

Research on use of aquatic vegetation by herbivorous fish		25,000
Wastewater reclamation studies	272,000	136,000

Illinois

University of Illinois

Research on pesticides	47,600	47,600
Studies on nitrogen in the pollution of waterways		87,509

<i>Iowa</i>		
Iowa State University		
Research on nitrogen transformations	123,000	32,845
<i>Massachusetts</i>		
Harvard University		
Environmental planning in New England		78,000
Massachusetts Audubon Society		
Environmental intern program in New York State	15,000	15,000
Woods Hole Oceanographic Institution		
Research on bioconcentration of toxic pollutants	59,000	29,350
Research on marine resource exploitation	16,252	20,707
Special institutional grant	1,500	1,500
Tertiary sewage treatment and aquaculture system		150,000
Workshop on critical problems of the coastal zone		5,175
<i>Michigan</i>		
Michigan State University		
Research and graduate training on the public health aspects of wastewater reclamation	326,000	
<i>Mississippi</i>		
Mississippi State University		
Study of plant resistance to insects	27,720	27,720
<i>Missouri</i>		
University of Missouri		
Environmental Trace Substances Center		83,214
<i>New Jersey</i>		
Princeton University		
Development of mass spectroscopic sensor for air quality measurements		15,000
Research in ecology by its Center of International Studies		7,500
Rutgers, the State University		
Investigation of the attitudes of key public leaders concerning environmental issues of the Hudson Basin region	10,000	
Statewide natural resources planning	70,000	35,000
<i>New York</i>		
Associated Universities		
Experimental research on metal hydride systems	5,000	5,000
Workshop on the quantification of the external costs of energy at Brookhaven National Laboratory	5,000	5,000
Boyce Thompson Institute for Plant Research		
Research on plant life and ecosystem of the Hudson River Basin		140,315

Citizens for Clean Air		
Participation in the public service commission's inquiry into energy conservation measures of Consolidated Edison Corporation	15,000	15,000
City College, City University of New York		
Research in water quality management	79,000	54,000
Committee for Economic Development		
Nationwide research on improving the quality of the environment		25,000
Cornell University		
Agricultural waste and nutrient management program		141,540
Initiation of a program to identify environmental concerns of the public in the Hudson Basin region	10,000	15,000
Research on insect pheromones		12,500
Research on pesticides	50,000	50,000
Council on the Environment of New York City		
Assessment of critical environmental problems affecting New Yorkers between 1974 and 1984	20,000	20,000
Mid-Hudson Pattern for Progress		
Defining priorities on environmental issues in the metropolitan New York-New Jersey area and the Hudson River Basin	308,563	301,408
Regional Plan Association		
Research on the relationship between urban land use and public transportation	25,000	
Rockefeller Foundation		
New York program expenses	236,100	248,465
Staff assigned to other organizations	184,300	104,605
State University of New York at Binghamton		
Research on trace metals in the upper Susquehanna River Basin	2,500	9,282
State University of New York at Stony Brook		
Urban and Policy Sciences Program		114,548
State University of New York, College of Environmental Science and Forestry		
Research on insect pheromones	33,253	2,081
North Carolina		
Duke University		
Marine science environmental training program for scientists from the developing countries	82,000	
University of North Carolina		
Evaluation of water management in England and Wales	20,000	

<i>Ohio</i>		
Case Western Reserve University		
Phosphorus studies		109,950
<i>Oregon</i>		
Oregon State University		
Air pollution studies in the Willamette River Basin		252,400
<i>Pennsylvania</i>		
Academy of Natural Sciences of Philadelphia		
Research and teaching in fresh water ecology		114,073
Support of a symposium on watersheds	6,000	
Drexel University		
Development of a gamed simulation of regional energy planning	25,000	25,000
Pennsylvania State University		
Research and training in environmental studies		139,135
Western Pennsylvania Conservancy		
Research on land use policy for Pennsylvania	10,000	10,000
<i>Texas</i>		
Texas A & M University		
Study of plant resistance to insects	90,400	90,400
<i>Utah</i>		
University of Utah		
Energy assessment for Utah conducted by the state science advisor	5,350	
Utah State University		
Development of a land use planning data storage system	20,000	
Research and training in environmental studies		240,000
<i>United States—General</i>		
Fellowships and scholarships	23,990	9,478
Miscellaneous small payments or refunds each under \$500		(20)
TOTAL	<u>\$2,627,172</u>	<u>\$3,617,188</u>

ALLIED INTERESTS

The campaign against schistosomiasis remains important to the Foundation's traditional interest in tropical medicine. Staff on the St. Lucia project was greatly encouraged by the fact that the long struggle for provision of a safe water supply for household use has resulted in significantly fewer instances of the disease. At the same time the search for a vaccine and a new chemotherapeutic agent was continued.

In a related endeavor Case Western Reserve University was given a grant to develop a new division to promote research, teaching, and training in tropical medicine, which will include work in tropical areas with specific infections. (U.S. expertise in tropical disease has declined since World War II to the point where in most medical schools the student receives less than sixteen hours of teaching in this subject.)

Two grants were made to New York University for an analytical survey of the current status of the use of closed-circuit television as an extension of physicians' services.

The year 1973 was another successful one at the Bellagio Study and Conference Center with 445 persons attending 25 conferences, six of which were led by Foundation officers. The participants came from North and South America, Europe, Africa, Asia, and Australia to examine ways of working together to solve common problems ranging from means of increasing agricultural production and achieving more even distribution of goods to personal freedom in an era of social engineering. There were 70 resident scholars, the largest number in the fourteen-year history of the Center.

STUDY AWARDS

INDIA

BARMAN, RAKTAKAMAL Ph.D., School of International Studies, New Delhi, 1969. Political Science. Appointed from Indian Council of Social Science Research. Place of study: U.S.A. f-ss

<i>Schedule of Marketable Securities</i>	109

SUMMARY

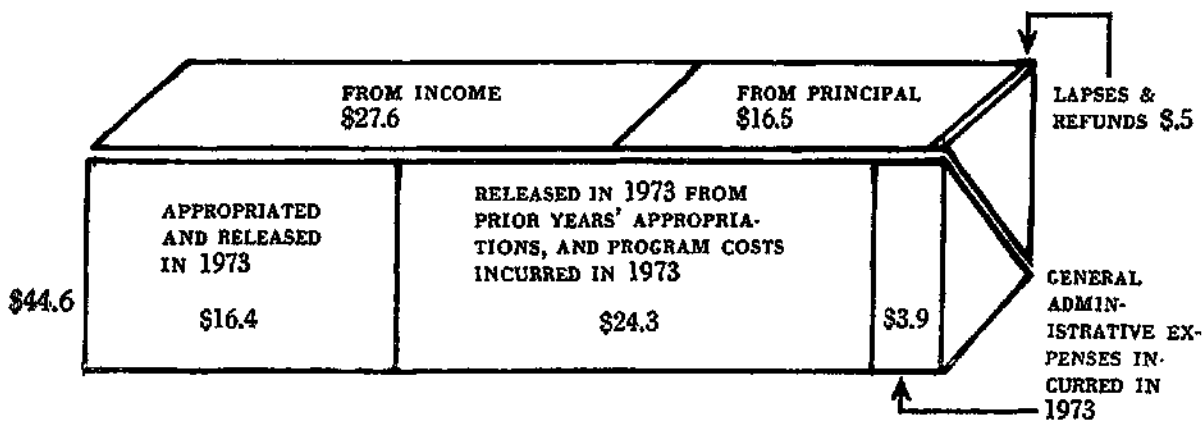

The financial statements for 1973, detailed on the following pages, reflect four important changes: (1) Investment assets and principal fund balance are stated on the basis of market value rather than ledger value as in the past; (2) Income is reported as accrued rather than on a cash basis; (3) General administrative and program expenses are reported as incurred rather than when approved by Trustee appropriation; and (4) A distinction is made in grants between those announced and released for specific recipients and those made by the Trustees but not yet released to the recipient.

Appropriations: All expenditures of The Rockefeller Foundation are authorized through appropriations made by the Trustees. During 1973 the Trustees appropriated \$44 million (\$43.1 million after lapses and refunds):

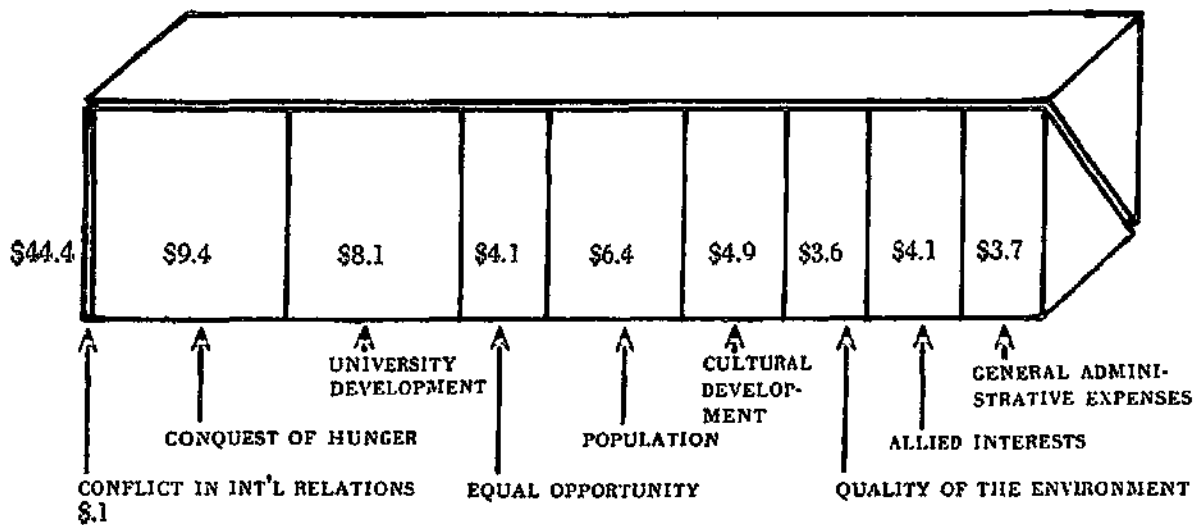

Under the new reporting procedures, total Trustee appropriations will not be reflected directly in the operating statement as they have been in prior years; only grant appropriations announced and program costs and general administrative expenses incurred during the year will appear in that statement. Appropriations not yet released and appropriations for program costs and general administrative expenses for the following year are shown as a designated part of principal fund.

Programs and Grants Announced: In addition to \$16.4 million appropriated and released in 1973, releases by the officers during the year from prior years' appropriations, and program costs and general administrative expenses incurred during the year, total \$28.2 million. (This combined sum of \$44.6 million was reduced by \$.5 million in lapses and refunds.) The balance was charged to \$27.6 million of net investment income and to \$16.5 million of fund principal. In addition, the Foundation incurred \$2.6 million in federal excise tax on investment income and realized capital gains.

Payments: Some grants are paid almost as soon as made, others are paid over several years. Payments during the year on all programs and grants, and for 1973 general administrative expenses, total \$44.4 million, distributed as follows:

Since its founding in 1913 The Rockefeller Foundation has paid out almost \$1 billion 130 million, of which \$902 million came from income and \$228 million came from principal.

Investment Managers: In addition to its action in January, 1972 assigning approximately \$200 million to four managers of equity funds, the Foundation in October, 1973 assigned \$75 million to two managers of bond funds. Each of the latter, in varying degree, deferred commitment to long-term investments. The investment and reinvestment of these funds on a short-term basis resulted in an unusually high figure for purchases and dispositions of securities.

The Financial Statements for 1973 and the opinion of Arthur Young & Company, Certified Public Accountants, are presented on the following pages.

ACCOUNTANTS' OPINION

ARTHUR YOUNG & COMPANY

277 PARK AVENUE
NEW YORK N Y 10017

The Board of Trustees
The Rockefeller Foundation

We have examined the accompanying statement of assets, obligations and principal fund of The Rockefeller Foundation at December 31, 1973 and 1972 and the related statements of operations, changes in principal fund and changes in financial position for the years then ended, and the supplemental schedules of marketable securities at December 31, 1973 and transactions therein for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the statements mentioned above present fairly the financial position of The Rockefeller Foundation at December 31, 1973 and 1972 and the results of operations, changes in principal fund and changes in financial position for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis after restatement for the changes in accounting principles, with which we concur, as explained in Note 1.

Arthur Young & Company

February 5, 1974

STATEMENT OF ASSETS, OBLIGATIONS AND PRINCIPAL FUND

DECEMBER 31, 1973 AND 1972

<i>ASSETS</i>	1973	1972 (Restated— Note 1)
Marketable securities, at quoted market value (fair market value at date of gift or purchase cost— 1973: \$536,119,092; 1972: \$463,582,121) (Note 1)	\$829,786,159	\$967,972,327
Cash	502,420	795,986
Accounts receivable and advances	8,081,000	467,096
Accrued income receivable	2,008,118	2,140,018
Property—at nominal or depreciated amount	<u>109,150</u>	<u>93,878</u>
Total assets	<u>\$840,486,847</u>	<u>\$971,469,305</u>

OBLIGATIONS AND PRINCIPAL FUND

Accounts payable and accrued liabilities	\$ 3,305,073	\$ 322,671
Federal excise tax payable (Note 2)	2,635,487	2,024,109
Deferred federal excise tax (Note 1)	3,385,113	9,429,601
Appropriations by the Trustees, announced and released for specific purposes but not yet paid (Notes 1 and 4)	<u>44,770,367</u>	<u>45,366,080</u>
Total obligations	<u>54,096,040</u>	<u>57,142,461</u>
Principal fund:		
Appropriations by the Trustees not yet released for specific grantees, and appropriations for program costs and general administrative expenses for the following year (Notes 1 and 4)	42,838,810	43,838,580
Unappropriated	<u>743,551,997</u>	<u>870,488,264</u>
Total principal fund	<u>786,390,807</u>	<u>914,326,844</u>
Total obligations and principal fund	<u>\$840,486,847</u>	<u>\$971,469,305</u>

See accompanying notes.

STATEMENT OF OPERATIONS AND CHANGES IN PRINCIPAL FUND

YEARS ENDED DECEMBER 31, 1973 AND 1972

	<i>1973</i>	<i>1972</i> (Restated— Note 1)
Investment income:		
Dividends	\$ 25,407,843	\$ 25,946,078
Interest	4,071,748	1,653,478
Royalties on investment received by bequest	107,219	111,562
	<u>29,586,810</u>	<u>27,711,118</u>
Less: investment expenses	913,588	811,771
	<u>28,673,222</u>	<u>26,899,347</u>
Investment income before federal excise tax	28,673,222	26,899,347
Less: provision for federal excise tax (Note 2)	1,109,365	1,075,974
Net investment income	<u>27,563,857</u>	<u>25,823,373</u>
Grant appropriations announced and program costs incurred during the year	40,271,699	38,247,241
General administrative expenses	3,869,182	3,414,061
	<u>44,140,881</u>	<u>41,661,302</u>
Excess of grant appropriations announced and program costs and general administrative expenses incurred over income	(16,577,024)	(15,837,929)
Principal fund at beginning of year as restated (Note 1)	914,326,844	778,659,266
Increase (decrease) in unrealized appreciation on marketable securities net of deferred federal excise tax (1973: reduction (\$6,030,000); 1972: provision \$3,950,000) (Note 2)	(204,693,139)	57,448,375
Realized gain on sale of marketable securities less provision for federal excise tax (1973: \$1,498,469; 1972: \$974,011) (Note 2)	93,242,842	93,697,674
Contributions to the Foundation	76,012	367,510
Net increase (decrease) in property account	<u>15,272</u>	<u>(8,052)</u>
Principal fund at end of year	<u>\$786,390,807</u>	<u>\$914,326,844</u>

University Development	8,108,751	7,952,419
Equal Opportunity	4,113,577	4,987,863
Population	6,346,031	6,845,768
Cultural Development	4,910,638	4,359,817
Quality of the Environment	3,615,876	3,680,432
Allied Interests	4,133,846	4,717,866
Conflict in International Relations	<u>135,575</u>	<u>—</u>
	40,706,831	40,613,254
General administrative expenses	3,739,184	3,414,061
Cost of securities purchased	583,400,263	295,788,081
Federal excise taxes paid	<u>2,010,943</u>	<u>1,166,450</u>
	<u>629,857,221</u>	<u>340,981,846</u>
Increase (decrease) in cash	(293,566)	49,612
Cash balance at beginning of year	<u>795,986</u>	<u>746,374</u>
Cash balance at end of year	<u>\$ 502,420</u>	<u>\$ 795,986</u>

See accompanying notes.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1973

1. *Accounting changes and summary of significant accounting policies*

In 1973, the Foundation made several changes in the application of generally accepted accounting principles, which it considered appropriate in the context of recent audit guides, with particular reference to the recommendations of an American Institute of Certified Public Accountants audit guide on Voluntary Health and Welfare Organizations, which was completed in 1973. In compliance with the latter guide, the changes have been made on a retroactive basis.

The Foundation changed its method of accounting for marketable securities from its prior carrying basis of cost (ledger amount) to the basis of market value. The increase in value resulting from changing the carrying basis from cost to market value was \$442,991,831 at January 1, 1972 and is accounted for by a retroactive restatement of the principal fund balance at that date. Subsequent transactions are shown in the accompanying statements on a market value basis.

The Foundation also changed its method of accounting for program costs and general administrative expenses to provide for the recognition of these expenses as charges to operations at the time at which they are incurred. Previously, the entire amount of budgeted program costs and general administrative expenses was charged against operations when appropriated by the Trustees.

In addition, the Foundation changed its method of accounting for investment income and expenses to a full accrual basis from the prior modified cash basis accounting. Previously, dividend, interest and royalty income were recorded as received and investment expenses were recorded as paid.

Also in 1973, the Foundation changed its method of accounting for grants to defer recognition of appropriations until grants are announced and released for specific grantees. Previously, grants were charged to operations when appropriated by the Trustees. The excess of announced grants and expenditures over income for the year is deducted from the principal fund.

The principal fund balance at January 1, 1972 reflects the changes described above as follows:

Principal fund—January 1, 1972 as previously reported	\$298,021,161
Reflection of marketable securities at quoted market value at January 1, 1972	442,991,831
Accrual of investment income and expenses	1,343,123
Deferral of recognition of an obligation until grants are announced and released for specific grantees and until program costs and general administrative expenses are incurred	41,756,876
Provision for deferred federal excise tax	<u>(5,453,725)</u>
Principal fund—January 1, 1972 as restated	<u>\$778,659,266</u>

NOTES TO FINANCIAL STATEMENTS *concluded*

DECEMBER 31, 1973

Federal excise tax on net investment income and realized tax basis gains on securities transactions is accrued as incurred. Deferred federal excise tax arises principally from differences in the tax basis and the market value of marketable securities.

2. *Federal excise tax*

The Foundation qualifies as a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code and accordingly is not subject to federal income tax. However, the Foundation is classified as a private foundation and as such, under the Tax Reform Act of 1969, is subject to a 4 percent excise tax on net investment income including dividends, interest, and net realized gains on securities transactions, reduced by related expenses. Not less than the fair market value at December 31, 1969 of securities owned at that date shall be used as the basis for determining taxable gains on subsequent sales of such securities. Accordingly, \$37,461,716 of the 1973 and \$24,350,297 of the 1972 gains on disposition of securities were subject to federal excise tax. The basis for calculating taxable gains of securities held at December 31, 1973 is \$746,731,721.

3. *Pension plan*

The Foundation has a non-contributory pension plan for all full-time salaried employees who have attained the age of 40 or are at least 25 years old with one year's service. It is the Foundation's policy to fund all current pension obligations as incurred and to amortize unfunded past service costs over a period of ten years. Plan costs, including charges for current service and amortization of unfunded prior service costs, amounted to \$885,970 in 1973 and \$787,115 in 1972.

At December 31, 1973 the present value of premiums payable through March 1, 1979 to complete the purchase of annuities for personnel who retired prior to July 1, 1966 was approximately \$800,000.

4. *Appropriations and expenditures*

Appropriations and expenditures for the year are summarized as follows:

	TOTAL APPROPRIATED	ANNOUNCED AND RELEASED	APPROPRIATED BUT NOT RELEASED
Balance, January 1, 1973	\$ 89,204,660	\$ 45,366,080	\$ 43,838,580
Appropriations by the Trustees	44,032,500	16,430,447	27,602,053
Less lapses and refunds	(891,389)	(498,510)	(392,879)
Released from prior years' appropriations	—	28,208,944	(28,208,944)
Expenditures for grants, program costs and general administrative expenses	<u>(44,736,594)</u>	<u>(44,736,594)</u>	<u>—</u>
Balance, December 31, 1973	<u>\$ 87,609,177</u>	<u>\$ 44,770,367</u>	<u>\$ 42,838,810</u>

SUMMARY OF TRANSACTIONS IN MARKETABLE SECURITIES

FOR THE PERIOD JANUARY 1 TO DECEMBER 31, 1973

	LEDGER AMOUNT	MARKET VALUE
Balance, January 1, 1973	\$ 463,582,121	\$ 967,972,327
